## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claim 43 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chkudua (US 6,196,232).

Disclosed by Chkudua is a magnetic hinge comprising a first hinge plate **14** and a second hinge plate **12**, both of non-magnetic material and each having at least one magnet **74,42**, respectively, disposed therein. The magnets are inherently oriented in the same magnetic orientation and are parallel when the hinge is closed as seen in figure 2 and are in non-overlapping and opposite magnetic orientations with the hinge is opened as seen in figure 1. Chkudua does not specifically teach the magnets are rectangular but does teach that alternative magnets can be used (col. 3, lines 20-21).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize magnets of a rectangular shape (and make the apertures of a corresponding rectangular shape) since such a modification would have involved a mere change in the shape of a component. A change in shape is generally recognized as being within the level of ordinary skill in the art. Doing so allows for utilizing other magnets as taught by Chkudua (at column 3, lines 20-21).

### ***Allowable Subject Matter***

3. Claims 40 and 41 are allowed over the prior art of record.
4. The following is a statement of reasons for the indication of allowable subject matter: the rejection under 35 USC 112, 2<sup>nd</sup> paragraph is overcome by applicant's remarks filed November 9, 2005. the prior art does not teach nor fairly suggest a magnetic hinge as set forth

Art Unit: 3727

wherein means for precluding relative sliding movement parallel to the hinge axis between first and second plates.

### ***Response to Arguments***

5. Applicant's arguments filed November 9, 2005 have been fully considered but they are not persuasive.

In response to applicant's argument that the examiner's conclusion of obviousness lacks motivation for modifying the reference. The patent to Chkudua teaches alternative magnets can be used in the hinge plates. This is sufficient motivation and suggestion to change the shape of the magnets used for the hinge.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3727

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

8. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. \_\_\_\_\_ is being facsimiled to The U.S. Patent and Trademark Office via fax number 571-273-8300 on the date shown below:
